

14th five-year plan new solar container

What is the implementation plan for the development of new energy storage?

In January 2022, the National Development and Reform Commission and the National Energy Administration jointly issued the Implementation Plan for the Development of New Energy Storage during the 14th Five-Year Plan Period, emphasizing the fundamental role of new energy storage technologies in a new power system.

What's new in the 14th five-year plan?

Milestones have also been crossed in aerospace with the Tiangong space station, the Chang'e-6's lunar far-side sample return, and the C919 passenger jet's commercial debut. Emerging strategic industries outlined in the 14th Five-Year Plan such as new energy vehicles went from playing catch-up to leading globally.

How big will electrochemical energy storage be by 2027?

Based on CNESA's projections, the global installed capacity of electrochemical energy storage will reach 1138.9GWh by 2027, with a CAGR of 61% between 2021 and 2027, which is twice as high as that of the energy storage industry as a whole (Figure 3).

How to promote the implementation of independent energy storage stations?

To promote the implementation of independent energy storage stations, it is necessary to further optimise the electricity market mechanism. segments and targets. Investor participation is beneficial for the development of the energy storage industry.

Will the energy storage industry thrive in the next stage?

The energy storage industry is going through a critical period of transition from the early commercial stage to development on a large scale. Whether it can thrive in the next stage depends on its economics.

How does the 14th five-year plan differ from previous five-year plans?

The 14th Five-Year Plan differs from past plans in that it also includes a short section on "long-range objectives" for 2035. Note that although this document is an "outline," the PRC government has labeled the longest and most authoritative full versions of previous five-year plans it released as "outlines" as well.

The Implementation Plan focuses on six major directions and clarifies the key tasks during the 14th Five-Year Plan period. First, we should pay attention to systematic planning of energy ...

This is another important layout of Alibaba's AI strategy after announcing a 380 billion investment in AI infrastructure at the beginning of the year. Previously, Alibaba had been heavily focused on the B-end ...
