

Kiribati's energy story highlights both the successes and pitfalls of off-grid solar projects in the South Pacific, a region that includes some of the world's poorest countries. On one hand, energy experts say such initiatives have brought power to thousands of remote villages despite enormous geographic and logistical obstacles.

A typical solar water heating system incorporates a solar collector, circulation pump, storage tank, controller, piping and various valves. There are many different configurations possible, the choice of design will depend on the purpose of the system, climate, space ...

The potential for solar power in Kiribati is immense, given the country's location near the equator and its abundant sunshine. In recent years, the government of Kiribati has recognized the need to transition to renewable energy sources and has set ambitious targets to increase the share of renewables in its energy mix.

The Apricus PV-ETC20-200 solar system is designed to use free solar energy only. It can be applied for a wide variety of solar thermal (heat) applications in almost any climate. This system provides a complete package of 200L solar hot water heating solution, which technology provides very efficient and reliable solar hot water in a simple ...

The South Tarawa Renewable Energy Project (STREP-the project), ADB's first in Kiribati's energy sector, will finance climate-resilient solar photovoltaic generation, a battery energy storage system, and will support institutional capacity building including the development of an inclusive and gender-sensitive renewable energy enabling framework ...

Über die Apricus Solar AG. Unser Unternehmen ist aus der Winkel Energiesysteme GmbH hervorgegangen, einem Vorreiter in der Installation von Solaranlagen für Privatkunden. Nun bieten wir hochwertige Dienstleistungen im Bereich ...

Kiribati's energy story highlights both the successes and pitfalls of off-grid solar projects in the South Pacific, a region that includes ...

Apricus is a leading designer and manufacturer of solar hot water and hydronic heating products. With a focus on continual improvement of products, management and service, Apricus completes R& D and manufacturing in the company-owned facility that is certified to ISO9001:2008 management and production standards.
