

Standby generator systems are designed to keep lights and home appliances powered in the event of a power outage - automatically. Best of all, they provide peace of mind that your family won't have to endure another headache-inducing power outage in the dark.

Buy a reliable home standby generator that will ensure you have a backup power supply to keep you and your family safe in the event of an emergency. Installation and maintenance available. +44 01977 800371

We produce backup generators that actively communicate with other generators or power sources to run several of them side by side, also available to be phased in and loaded against the power grid. Fully automatic generators.

A backup generator is a secondary power source that automatically activates when the primary electrical supply fails. These systems are critical for ensuring continuity in power supply across various applications, preventing disruption, and safeguarding against data loss, operational downtime, and even safety hazards.

This article reviews the best five automatic home standby generators that you can consider. If you're planning to buy a home standby generator, this review is for you.

Whether you need open generators, built-in generators, fully automatic backup generators, or mobile generators, we have the perfect solution for you. Additionally, we have extensive experience in custom manufacturing backup power systems for various customers, including municipalities, insurance companies, emergency services, defense, Ikea, and ...

Backup power generators can start automatically in case of a power outage and can be used in parallel with the electric grid if needed. The machines can be supplied in open type, soundproof weatherproof enclosures, mobile with wheel chassis, or container-mounted according to the customer's preferences.

Our weather-resistant container-built generators can be customized with sound and heat insulation to meet your specific needs and preferences, making them perfect for harsh winter conditions. Additionally, we offer complete ventilation and exhaust systems with a power range from 8 to 1200 kVA.

Unlike portable generators, which require manual setup and activation, standby generators are permanently installed outside your home or business. Most permanent generators come with an automatic switch which, as the name suggests, will automatically turn on and supply backup power in the event of an outage.

With an automatic backup generator system there is no intervention needed and you can rely on your generator to automatically begin powering up your home in the event of a power outage. Call 07984 554139
