

The Battery Competence Cluster - NL is the innovation program for companies, knowledge institutions and organizations that want to work together to acquire knowledge and develop skills in the field of battery technology. The Dutch battery, transport and shipping industry join their forces in the Battery Competence Cluster - NL.

The Dutch high-tech ecosystem has sprouted seven companies that are looking to improve lithium-ion battery technology, or market completely different battery designs.

Operating from our three dedicated facilities in the Netherlands, France, and England, we offer fast, reliable, and flexible services tailored to the needs of our customers across Europe. Through our focus on repair, eco-engineering, storage, and battery reuse, we are committed to powering a sustainable future--one battery at a time.

Our 336 kWh lithium-ion battery containers are among the most powerful in the business of mobile battery power. In addition, our Energy Management System monitors and controls the batteries and other energy sources. 24/7. Locally and remotely.

Brainport Eindhoven is a top technology region in the Netherlands and the centre of Europe for developing new battery applications and scaling new battery technologies. In the development of a strong battery value chain, collaboration between the local high-tech manufacturing industry, vehicle Original Equipment Manufacturers (OEMs) and ...

Wetac Battery Company is a Dutch company, established in 1985 under the name Wetac Auto Materials. We supply batteries and battery related products to companies throughout Europe. Our headquarter is situated in Ede (NL), in addition to that we also have branches in Germany, Switzerland, England and the Czech Republic.

LeydenJar, a Dutch manufacturer developing batteries that can store huge amounts of energy, has announced that it will open its first factory in Eindhoven. The young innovators shared plans to begin production in 2026, as they continue to create the world's most energy-dense battery .

Wetac Battery Company is a global supplier of batteries and accessories in various sectors. Our headquarter is situated in Ede (Netherlands), we also have subsidiary companies in Germany, Switzerland, England, Greece and the Czech Republic.

Within Europe, the Netherlands is one of the leading countries when it comes to developing next generation and more sustainable battery materials and components. It already has four silicon anode companies - one of

Battery companies in The Netherlands

the highest concentrations of ...
