

Battery transport box Estonia

What is the best safety box for EV battery transport?

If you are looking for the perfect safety box for EV battery transport, we highly recommend one of our pre-approved systems, such as the Cobat Lithium Box or the Bebat PRO drums and ASPs.

What is a used battery storage box?

Used battery collection, storage and transport box made of highly resistant high-density polyethylene (PE-HD) - largely acid-resistant. Ideal storage and transport system for used batteries. Space saving - up to 7 boxes can be stacked. Max. load up to 600 kg as an individual box, up to 450 kg per box when stacked.

Are end-of-life EV batteries safe to transport?

This 'utmost care' is no luxury either, because for all end-of-life batteries, transport is a critical phase in the recycling process. And it is certainly important enough not to be left to chance. Starting point: end-of-life EV batteries are regulated as hazardous goods for transport.

What are the risks associated with lithium-ion batteries?

The risks associated with lithium-ion batteries are mainly related to deviations from normal operating conditions, which result in a state of "criticality" or "damage" of the battery itself.

How to choose the best EV battery packaging?

1. Base your choice of packaging for end-of-life EV batteries on the dimensions, the chemical composition, the actual condition, the geometry and power (kWh) of the battery, plus the required procedures in your situation. If you have a complex issue, ask advice from professionals with the necessary expertise. 2.
