In a nutshell, most solar powered homes sell their excess energy back to BELCO via a set rate called the "Feed in Tariff". Of course, solar energy is produced during the day so when electricity is needed to power a house at ...

In a nutshell, most solar powered homes sell their excess energy back to BELCO via a set rate called the "Feed in Tariff". Of course, solar energy is produced during the day so when electricity is needed to power a house at night, or on cloudy days, solar homeowners must buy it like everyone else.

Investing in technologies that use our abundant sunshine, the Government supports solar photovoltaic installations with its rebate initiative, offering up to \$8,000 cashback for homes with Annual Rental Values (ARVs) of under \$30,000 and continuing in declining tiers to ARVs up to \$120,000.

Bermuda solar housing

The Regulatory Authority's Integrated Resource Plan, introduced in 2019, aims for Bermuda to be 80 per cent dependent on renewable energy, such as wind and solar power, by 2035.
