Where is Bouvet Island?

Bouvet Island (/ˈbuːveɪ /BOO-vay; Norwegian: Bouvetøya [buˈvøːə]) is an uninhabited subantarctic volcanic island and dependency of Norway. It is a protected nature reserve, and situated in the South Atlantic Ocean at the southern end of the Mid-Atlantic Ridge, it is the world's most remote island.

How far is Bouvet Island from Antarctica?

Bouvet Island is one of the most remote islands in the world. The closest land is Queen Maud Land of Antarctica, which is 1,700 km (1,100 mi) to the south,; 58 and Gough Island, 1,845 km (1,146 mi) to the north.

Could Bouvet Island expand eastward?

Bouvet Island is among the least studied islands of the Southern Ocean (Watkins et al. 1984 ). Its remote situation within the ACC/Westwind Drift raised speculations as to a possible eastward expansion of the South American biogeographic provinces.

Is Bouvet Island a biotic exchange Island?

Especially worth mentioning is the island chain of the Scotia Arc, which via the West Wind Drift and a system of eddies is continuing to support to some extent the biotic exchange between areas north and south of the Polar Front. Bouvet Island is among the least studied islands of the Southern Ocean (Watkins et al. 1984 ).

How did Bouvet Island become a dependency?

The expedition carried out aerial photography of the island and was the first Antarctic expedition to use aircraft. : 64 The Dependency Act, passed by the Parliament of Norway on 27 February 1930, established Bouvet Island as a Norwegian dependency, along with Peter I Island and Queen Maud Land.

Are there humans on Bouvet Island?

In 1971, Norway declared the island a protected nature reserve. Today, there is virtually no sign of human activity at Bouvet, with the exception of a single weather station located at Nyreøya. This is the most common landing point on the island created by a rockslide in the 1950s. Penguins are the most apparent life on the island.

## Bouvet Island dragon solar

We've got a place that beats them all: Bouvet Island, a small outcropping of rock and ice in the Southern Ocean. The nearest land is more than a thousand miles away, making Bouvet the most remote island on the planet. A French sailor named Bouvet discovered the island in 1739. And then he promptly lost it -- he misplotted the island on his ...

Bouvet'sya (Bouvet Island) is one of the most isolated islands on earth. Situated in the southern Atlantic Ocean, it hosts the second largest breeding population of Antarctic fur seals (*Arctocephalus gazella*) in the world as well as a small breeding population of southern elephant seals (*Mirounga leonina*). The isolation of the island ...
