

# Brazil brill power

Who is Brill power?

Work with Brill Power's whole platform to fully benefit from an end-to-end solution and optimise management of your battery energy. Brill Power works at the cutting edge of energy storage, power electronics, and battery software. We are a team of problem solvers and innovators, keen to make energy storage as efficient and sustainable as possible.

What is Brill Power's Battery intelligence platform?

Brill Power's Battery Intelligence Platform brings transformational advances in longevity, performance, cost and sustainability to electric vehicles and stationary energy storage. It is the ultimate end-to-end solution replacing legacy battery management systems and power conversion technology.

Is Brill power FCC approved?

Brill Power's battery management system is FCC approved, meaning we can deliver all its benefits to our US-based customers. The FCC mark is required in order to import and sell electronics in the USA that may cause RF and EMI interference. Rigorous testing in our UK-based lab has achieved this important milestone for all our BESA products.

What information does Brill Power Limited collect from Companies House?

BRILL POWER LIMITED - Free company information from Companies House including registered office address, filing history, accounts, annual return, officers, charges, business activity Cookies on Companies House services We use some essential cookies to make our services work.

Why did Brill power raise \$10.5m in 2022?

Brill Power successfully achieved a Series A round raising of \$10.5m in 2022 to support their mission to make batteries smarter, cleaner, safer and longer-lasting as a critical element of the shift to zero emissions energy.

Does the BrillCore include a DC/DC converter?

The BrillCore includes a fully integrated DC/DC converter. Brill Power's Battery Intelligence Platform transforms electric vehicles and stationary storage by replacing the conventional battery management system with three key technologies: BrillCore, BrillOS, and BrillAnalytics.

Brill Power's Christoph Birkl, CEO and co-founder and Damien Frost, CTO and co-founder, have published an article in The Engineer magazine talking about how their chemistry-agnostic battery management system (BMS) is helping ...

Brill Power's Battery Intelligence Platform transforms electric vehicles and stationary storage by replacing the conventional battery management system with three key technologies: BrillCore, BrillOS, and BrillAnalytics.

## Brazil brill power

Brill Power brings together a unique team of world-class experts in battery and power management, edge computing, and data analytics, to work on its market leading Battery Intelligence Platform.

Brill Power's breakthrough technology will transform the cost and performance of energy storage systems by increasing battery life by up to 60%, enhancing storage capacity by up to 129%, increasing systems uptime and driving down the lifetime operating costs for energy storage systems.

Brill Power's mission is to harness the potential in novel battery management systems to improve the performance and reduce the costs of ownership of stationary & motive power batteries as ...

Brill Power's Christoph Birkl, CEO and co-founder and Damien Frost, CTO and co-founder, have published an article in The Engineer magazine talking about how their chemistry-agnostic battery management system (BMS) is helping enable new technologies to be scaled up.

4 &#0183; 2024 has been a busy year at Brill Power. We've brought our BESA BP6X1 product to market, undertaken extensive testing in our lab to validate the system up to 850V and supported customers on 3 continents to integrate ...

Brill Power operates at the forefront of energy storage, power electronics, and battery software, with a team dedicated to enhancing energy storage efficiency and sustainability. They offer job ...

Established in 2016, Brill Power is a spin-out of the Engineering Department at the University of Oxford revolutionising energy storage through its pioneering battery intelligence platform that ...

Brill Power's mission is to harness the potential in novel battery management systems to improve the performance and reduce the costs of ownership of stationary & motive power batteries as an...

4 &#0183; 2024 has been a busy year at Brill Power. We've brought our BESA BP6X1 product to market, undertaken extensive testing in our lab to validate the system up to 850V and supported customers on 3 continents to integrate BESA into their energy storage systems. In parallel, Brill Analytics has now monitored over 45MWh of energy throughput, helping partners analyse and ...

**BRILL POWER LIMITED** - Free company information from Companies House including registered office address, filing history, accounts, annual return, officers, charges, business activity

Brill Power operates at the forefront of energy storage, power electronics, and battery software, with a team dedicated to enhancing energy storage efficiency and sustainability. They offer job opportunities for individuals passionate about driving innovation in the energy sector.

Established in 2016, Brill Power is a spin-out of the Engineering Department at the University of Oxford revolutionising energy storage through its pioneering battery intelligence platform that aims to make batteries

## Brazil brill power

perform better, last longer, and cost less financially and environmentally.
