How will solar power benefit Brunei?

The solar power generated is equivalent to the electricity consumption of approximately 600 households per year and will offset some of the power used by the BSP Head Office. On a national level, the power generated will contribute towards Brunei's target of producing 100MWp renewable energy by 2025.

Does Brunei have a sustainable future?

Brunei is targeting 30% renewable energy in total power generation mix by 2035, with 200 MWp of solar energy by 2025. The launch event also saw the release of Hengyi's 2023 ESG Report, which highlights their progress in environmental sustainability, social responsibility, and governance.

Can Brunei achieve 200 MWp of solar energy by 2025?

The Sultanate also targets achieving at least 200 MWp of solar energy capacity by 2025. This project also supports the Brunei Climate Change Secretariat's strategies to increase renewable energy adoption and reduce carbon emissions.

What is Sinar & how will it impact Brunei?

The solar energy generated through Project SINAR will not only support the energy needs of Hengyi Industries' Petrochemical Refinery but also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation. Stage 1 of Project SINAR is targeted to be fully completed at the end of April 2025.

What are the major solar installations in Brunei?

Major active solar installations in Brunei include the country's first, Tenaga Suria Brunei, launched in 2010 with a capacity of 1.2 MWp, and Brunei Shell Petroleum's 3.3 MWp solar plant, launched in 2021 to supply power to its headquarters. Both plants have plans for further expansion.

How will solar energy benefit Hengyi industries' petrochemical refinery?

"The solar energy generated through Project SINAR will not only support the energy need of Hengyi Industries' petrochemical refinery, but will also contribute to Brunei's national power grid when required, enhancing energy sustainability across the nation," said Qiu Jianlin.

Solarvest Holdings Bhd (Solarvest) and Serikandi Holdings Sdn Bhd proudly announced the successful launch of Brunei's first rooftop solar project at Jerudong International School. This historic initiative, with a capacity ...

The "Project Sustainable Integration of Natural and Renewable Energy" (Project SINAR) is set to install solar photovoltaic (PV) panels at Pulau Muara Besar (PMB) in ...

On a national level, the power generated will contribute towards Brunei's target of producing 100MWp renewable energy by 2025.

The Tenaga Suria Brunei Photovoltaic Power Generation Demonstration Project plant is an on-grid 1.2 megawatt (MW) solar photovoltaic (PV) power plant commissioned in 2010 as a part of a joint project between the Government of His Majesty the Sultan and Yang Di-Pertuan of Brunei Darussalam and Mitsubishi Corporation, Japan.

Much has been said about the potential of harnessing the sun to reduce the use of non-sustainable energy sources in Brunei. But solar energy has yet to take off in the sultanate. With its geographical position near the Equator, Brunei enjoys the sun all year round.

BPC proudly announce the commencement of the 1st solar PV system project to be made live in December 2020. The in-house pilot project highlights BPC's first endeavour to support the Brunei Government's 2035 vision of achieving a substantial contribution by renewable energy sources to Brunei's energy demand.
