

Cairo solar container technology support

What is solar & storage live Egypt?

Solar &Storage Live Egypt is Egypt's largest renewable energy exhibition that celebrates the technologies at the forefront of the transition to a greener, smarter, more decentralised energy system. Your free ticket gives you access to the premium conference, the exhibition and networking with thousands of industry leaders.

What is a solar container?

The Solar container is a photovoltaic power plant that was specially developed as a mobile power generator with collapsible PV modules as a mobile solar system, a grid-independent solution represents. Solar panels lay flat on the ground. This position ensures maximum energy harvest Panels lay flat on the ground.

How many installers does a solar container need?

At least 3-4 installers and 1 crane operator are needed to put the Solar container into operation within one day.

How many households can one Solar container supply with electricity?

How many households can a solar Container Supply?

Based on an average power consumption of a 4-person household of 4000 kWh per year and a location in Southern Germany, the solar container can supply approx. 32 households with climate-friendly electricity. At a location in Southern Europe it can even be up to 50 households due to the high solar radiation.
