Caldwell Energy is the only provider of all types of turbine inlet cooling technologies: Wet Compression Technology, Evaporative Cooling with Fog, Chilling and Thermal Energy Storage. Caldwell provides these systems for both new and retrofit applications and has worked directly with the major combustion turbine OEMs.

5 · According to ECLAC the significant rise in investment inflows to Guyana, positions it as one of the most attractive destinations for foreign capital in the Caribbean region and key player in the global energy market. Exxon has made over 30 discoveries in Guyana"s Stabroek Block, totaling more than 11.6 billion oil-equivalent barrels. The ...

6 · Guyana has emerged as a model for balancing economic development with environmental stewardship. Showing how the two goals need not conflict, Guyana is both capitalizing on its recent oil discoveries while also being a pioneer in biodiversity credits, expanding protected areas, and using oil revenue to finance renewable energy projects.

Caldwell Energy"s team of highly-skilled engineers and fabricators design and manufacture its systems to exact specifications, using time-proven components. Depending on the project requirements, Caldwell Energy can also handle installation, start-up and ongoing maintenance, as well as supply critical aftermarket parts for all system needs.

5 · (Piero Stewart, Energy Analytics Institute, 18 c.2024) -- ExxonMobil Corporation, with the previous announcement of the Hammerhead and Longtail projects offshore Guyana, looks to take the total number of developments in the prolific deepwater offshore Stabroek Block to 8 by 2030. In Stabroek, ExxonMobil (45% WI, operator) leads a 3 company consortium with ...
