The African Development Bank (AfDB) has issued a general procurement notice for JCM Greenquest Corporation's 72MW solar PV power plant in Mbalmayo. The AfDB-managed Sustainable Energy Fund for Africa has approved a grant to fund the development activities remaining to be completed for the project to reach financial close.

The Sustainable Energy Fund for Africa (SEFA) approved at the end of 2014 a USD 777,000 preparation grant for JCM Greenquest Solar Corporation to support the development of a 72 MW Solar Photovoltaic (PV) power plant as the first renewable energy Independent Power Producer (IPP) in Cameroon.

JCM PV PROJECT IN CAMEROON AT A GLANCE Type: ground-mounted solar PV project Land area: 174 hectares. Secured Declaration of Public Utility granting JCM exclusivity to complete land studies and sign a future site lease Solar irradiation: 1,657 kWh / kWp / year Project size: 60 MW AC / 72 MW DC Location: situated 7km South of the city

AfDB's Sustainable Energy Fund for Africa (SEFA) has approved a grant worth US\$777,000 for Canada's JCM Greenquest Solar Corporation to develop a 72MW solar photovoltaic (PV) plant in Cameroon

London: Joule Africa, the international energy developer behind Cameroon's proposed 607MW Kpep hydroelectric project, has entered into a Memorandum of Understanding (MoU) with the Government of Cameroon to develop 100MW of new solar PV facilities.

The project consists of the development and operation of a 72 MW solar PV power plant in, that could be one of the first renewable energy IPP in Cameroon. The project scope includes the construction of a 3 km transmission line to connect the facility to the grid at Mbalmayo substation with Solar Irradiation predicted at 1811 kWh/m²/year.

This will be the second loan Cameroon has secured from the bank for the solar electrification project, which aims to power 200 rural communities across the country. As a reminder, President Biya has already authorized the Minister of Economy to contract a CFA35 billion loan with Afreximbank on March 7, 2023.

(Business in Cameroon) - Cameroon is finally launching its long-awaited solar power plant project in the northern regions. Announced in 2021, the initiative will be effective this month. An official release from the Department of Water and Energy revealed that Minister Gaston Eloundou Essomba will preside over the launch ceremony during his ...

JCM Greenquest Solar Corporation SA (JGSC) is developing a 72 MWp solar power plant in Cameroon. JGSC is 100% owned by the JCM International Solar Development Fund V, a Canadian investment fund of
