5 · They're versatile but have lower efficiency and shorter lifespans than other panel types. The average price per watt is \$1.50 to \$2.50. Polycrystalline Panels. Manufactured using a less costly process, using silicon fragments, polycrystalline panels are moderately efficient and more affordable than their

Canadian solar panels

monocrystalline counterpart.

Dr. Shawn Qu, Chairman, President and Chief Executive Officer founded Canadian Solar (NASDAQ: CSIQ) in 2001 in Canada, with a bold mission: to foster sustainable development and to create a better and cleaner earth for future generations by bringing electricity powered by the sun to millions of people worldwide.

Canadian Solar panels have proven to be top tier worldwide, thanks to their decade-long experience and research. Pioneers in high-efficiency rates even in cases of low irradiance such as cloudy days, they are also perfect for every other environment, considering that their performance rates are still quite high, enabling them to stand strong ...
