

What is CEAG ZB-s?

Removing the requirement for separate data cables and reducing the cost of installation. The CEAG ZB-S is a reliable AC/DC central battery emergency lighting system popular worldwide it is installed in airports, stadiums, warehouses & more.

What is Eaton ZB-s - central battery emergency lighting system?

ZB-S - Central battery emergency lighting system Eaton's ZB-S is an emergency lighting central battery system that provides reliable power supply (230V AC/220V DC) to safety and exit luminaires. Automatically testing itself, the ZB-S individually monitors each CG-S luminaire (up to 20 per circuit) through the power supply cable alone.

What is a central battery subassembly?

This subassembly allows the connection of the central battery system to a central control station (ZLT) or building management system (BMS).

What services does CEAG offer?

Moreover, CEAG offers consultation and training services for planning, set-up and operation of lighting systems comprising the ZB96 system. A ZB 96 system supplies and monitors lighting/emergency lighting circuits comprising luminaires and electronic ballasts included in the CEAG Safety Luminaires Program.

What is a central battery system?

The central battery system serves for the battery-backed control and emergency supply of an emergency lighting system. The functions of the individual circuits are defined with the help of a user-friendly parameterization system. Requirements: Electronic ballasts/modules of type CG (CEWA GUARD) must be used.

Can a central battery emergency lighting system be used as an electrical distributor?

Experimental design for application as an electrical distributor with functional integrity. The functioning of all the installed electronic components was tested in a fire test. From one of the world's leading suppliers of emergency lighting, view the rest of Eaton's central battery systems DualGuard-S - Central battery emergency lighting system

System Benefits  
New charging technology  
o Increased safety via alternating booster switching  
o Less energy consumption of 10 % due to optimized efficiency  
o System for automated battery ...

The ZB-S and US-S Central Battery Systems are exclusively designed to monitor and control a lighting system with general and emergency lighting. Their operation is program controlled.
