

Colombia northvolt battery

Could Northvolt be a big EV battery company headquartered in Europe?

Northvolt has been their best shot at building a big, thriving EV battery business headquartered in Europe. Were the company to fail, ongoing progress in battery technology could make it even harder for another European company to attempt the same feat.

Can Northvolt compete with other Chinese battery makers?

If it was going to have a chance of competing with Contemporary Amperex Technology Co. and other Chinese battery makers, Northvolt needed to grow fast. The company amassed billions of dollars in debt and equity, secured using \$55 billion of contracts from some of Europe's biggest car and truck makers.

Why did Northvolt start a battery company?

Northvolt's ambition was to challenge the dominance of Asian battery makers, such as CATL and BYD in China. The company launched in 2016 with the idea of tapping cheap renewable energy to build lithium-ion batteries for electric vehicles (EVs). It promised 90% less CO₂ emissions compared to cells made using coal power by 2030.

Where is the Northvolt Drei EV battery plant?

The Northvolt Drei EV battery plant in Heide, Germany, one of several European-led battery facilities to have been delayed or canceled. Europe's bid to build a homegrown battery industry to break China's dominance in electric vehicles is failing.

What happened to Northvolt?

Northvolt's demise means the battle for dominance of the European market is likely to play out between Asian battery makers. LGES and SK On both have European plants, in Poland and Hungary respectively, while CATL has a factory in Germany and a second site in Hungary due to begin production next year.

Why was Northvolt canceled?

Northvolt's cash crunch and local factories getting canceled undermine the region's push to reduce reliance on Asia. The Northvolt Drei EV battery plant in Heide, Germany, one of several European-led battery facilities to have been delayed or canceled.

Volvo Cars has released a statement declaring that it plans to take full ownership of Novo Energy, a joint venture between Volvo and the Swedish battery company Northvolt. Novo Energy was launched between the two Swedish companies in June 2021.
