

L'énergie solaire en France est constituée des trois filières photovoltaïque, solaire thermique et solaire thermodynamique & concentration. Depuis les années 2010, leur développement est rapide et dominé par le photovoltaïque.

The France Solar Energy Market is expected to reach 22.96 gigawatt in 2024 and grow at a CAGR of 14.24% to reach 44.68 gigawatt by 2029. Engie SA, EDF Renewables, Albioma SA, TotalEnergies SE and Meeco AG are the major companies operating in this market.

Planta solar en Francia. En los primeros nueve meses de 2023, Francia ha experimentado un notable incremento en su capacidad de energía solar, con la instalación de 2,2 gigavatios adicionales. Este desarrollo sitúa la capacidad fotovoltaica total ...

This graph provides an annual and monthly overview of solar power generation in France. The evolution of solar photovoltaic generation is an important parameter in the energy transition, as it is a renewable and low-carbon energy. In 2022, solar power generation rose sharply on the back of expanded capacity and good sunlight.

France is aiming to increase its solar PV capacity from 11.5 GW in March 2021 to 23 GW by the end of 2023. The country offers feed-in tariffs for small-scale solar PV up to 100 kWp on rooftops for self-consumption, with a specific grid tariff for collective users and exemption from the domestic tax on electricity for projects under 1 MW.

Au 30 septembre 2023, le parc solaire au sol en France atteint une capacité installée de 19 GW, et l'électricité produite par la filière a atteint un nouveau record avec près de 19,4 TWh produits sur ces 3 trimestres. La région Nouvelle-Aquitaine est la plus productive, suivi par l'Occitanie et la région Provence-Alpes Côte d'Azur.
