

Energy storage summit 2025 Malawi

What is the Energy Storage Summit?

Our Summit aims to highlight the fundamental role that energy storage will play in this journey, and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead. One scenario estimates Europe will reach 29.6 GWh of installed capacity by the end of 2024, marking a 72% increase YoY.

When is the Energy Storage Summit 2025?

This 10th anniversary event takes place February 17-19, 2025, at the Intercontinental London - The O2. As a proud media partner, we can offer Faraday Institution Members 20% discount on their registration fee by using our unique discount code: FI20. For all event information, please visit the Energy Storage Summit 2025 website.

Why should you attend the Energy Storage Summit?

Over the past ten years, the Summit has gained recognition as the biggest, busiest, most informative, and best networking event in the European energy storage sector, where deals are made on site; generating efficient business for everyone who attends. Workshops, an after-party, private networking dinners and much more!

How much energy storage does the EU need?

Over the next five years, the EU needs to achieve a mammoth 187 GW total installed storage capacity to keep on track. Of the 5GW currently under construction in GB, 3.5GW of this is set to come online in 2024 with pipelines continuing to expand into 2025. These are just some examples of the urgent need for energy storage deployment across Europe.

How much storage capacity will Europe have by 2024?

One scenario estimates Europe will reach 29.6 GWh of installed capacity by the end of 2024, marking a 72% increase YoY. Over the next five years, the EU needs to achieve a mammoth 187 GW total installed storage capacity to keep on track.

Our Summit aims to highlight the fundamental role that energy storage will play in this journey and will strive to recognise, explore and analyse key challenges that may present themselves on the trajectory ahead. Key themes for 2025 will include: In-depth examinations of the energy storage opportunities across Europe; Market design and policy ...

2025 will see the return of the Breakout Zone, bringing you more interactive content where delegates and speakers have the opportunity to join forces during roundtables, working groups and workshops to discuss particular topics in more depth and hash out the key issues and challenges facing the industry.

2025 is set to be a pivotal year for the global energy transition, as we reach the halfway point in a significant
