

Eos sustainable energy solutions Spain

Information on valuation, funding, cap tables, investors, and executives for EOS Sustainable Energy Solutions. Use the PitchBook Platform to explore the full profile.

Technology will play a pivotal role in enabling Spain's energy transition. The development and deployment of new low-carbon technologies will be crucial in achieving sustainability goals.

EOS empowers its people to strive for results that increase energy efficiency, reduce waste, and use resources consciously at every step of the manufacturing process. EOS effort is confirmed by being selected to represent the 3D printing industry as part of the 50 Sustainability and Climate Leaders initiative.

This report tells you what distinguishes us as EOS. The home page contains the highlights of the past financial year, an interview with the EOS Group's Board of Directors and a video with our highlights from 50 years of EOS. We put ...

Together with the Otto Group, EOS is working on reducing emissions to net zero in the long run. The Otto Group is currently developing a science-based climate goal (based on the Science Based Targets Initiative, SBTi). The joint climate protection strategy is to fully comply with the 1.5-degree Celsius goal of the Paris Agreement.

Eos manufactures energy storage solutions with a duration of 3 to 12 hours. Its Znyth batteries are made using non-rare earth materials, and can be 100% recycled after their projected 20-year useful life.

Gonzalo Olivera, partner, and Ignacio Lopez Sol, associate at Addleshaw Goddard in Spain examine the main issues facing the energy sector in light of Spain's commitment to decarbonization, the proposed solutions to tackle them and the steps, such as development of green hydrogen and biomethane, that may be taken to achieve Spain's long ...

We put together key figures, financial insights and business results on the subpage "Our 2023/24 fiscal year".

Learn all about the performance of the EOS Group: KPIs, overview of business highlights, and information about what the EOS Group is doing to meet its ESG (environmental, social and governance) responsibilities.

EOS SUSTAINABLE ENERGY SOLUTIONS INC. is an international energy company based in Germany, founded to provide innovative energy solutions driven by science and technology.

Eos sustainable energy solutions Spain

"Adeje Verde" is the first self-consuming energy community of its kind in Europe and, as of now, the largest solar circle in Spain; Excess solar photovoltaic (PV) energy is no longer fed back to the grid, but instead passed on to neighbours living in a 2000-metre radius around the PV system
