

Where are FAAM batteries made?

FAAM's lithium-ion batteries are made with our in-House manufactured li-on cell with LFP cathode active material. Starting from the chemistry,going through the battery system,we are able to deliver the first and only full made in Italylithium battery. FAAM's in-house manufactured cells.

Do FAAM batteries come with bolted connectors?

Of course Faam batteries come with bolted connectors as standardbut they also has a specially patented cell lid that is preventing acid leakage. Faam TTM/TTS gives you longer life compared to a standard 1500 cycle battery,thanks to its design life and lower operating temperatures. On top of this there is a potential 7% energy saving.

Are FAAM batteries a good value for money?

With an energy saving battery from Faam you get very good value for money- especially in a tough tropical climate. Of course Faam batteries come with bolted connectors as standard but they also has a specially patented cell lid that is preventing acid leakage.

What is FAAM - battery management system (BMS)?

Since 2004 FAAM develops customized solutions with quality standards of excellence, made up of lithium batteries complete with our innovative management system (BMS - Battery Management System). With automotive, traction and stationary applications.

What is the difference between FAAM TTM/TTS and FAAM top?

Faam TTM/TTS gives you longer life compared to a standard 1500 cycle battery, thanks to its design life and lower operating temperatures. On top of this there is a potential 7% energy saving. Faam TOP gives you at least 25% longer life compared to a standard 1500 cycle battery, thanks to its design life and lower operating temperatures.

What is the FAAM service?

The FAAM Service represent a point of reference in the field of assistance on all energy storage systems with lead and lithium technology, for industrial applications (traction and stationary) and automotive one. Ask a question to this supplier?

Since 2004 FAAM develops customized solutions with quality standards of excellence, made up of lithium batteries complete with our innovative management system (BMS - Battery ...

The SAFE range, designed for vehicles of all categories, is the concrete answer to the ever-increasing demand for energy and the need for a high power accumulator for high starting currents, combined with safety and extreme reliability.

Faam battery Jersey

Faam TOP gives you at least 25% longer life compared to a standard 1500 cycle battery, thanks to its design life and lower operating temperatures. On top of this there is a potential 12% energy saving. Through FAAM we can also offer stationary batteries; from long term cyclical use to emergency power supply.

From the active material (Lithium - Iron - Phosphate), through the production of the cell using a water-based process, to the battery system including our BMS (battery ...
