

Georgia solar

Does Georgia have solar?

Want Solar? Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity*, generate significant carbon-free energy for Georgians during sunny, daylight hours.

Where in Georgia can you sell solar energy?

The largest, at 128 MW of capacity, is located at Robins Air Force Base in Warner Robins, Georgia. Other facilities add carbon-free energy to the grid and supply renewable energy in support of our Community Solar program. 1. North Georgia 2. South West Georgia 3. East Georgia Want to sell solar energy? Now everyone can use solar!

Could a community solar program benefit Georgia Power customers?

Several solar industry insiders made a pitch to a Georgia House committee on Wednesday for the economic and environmental benefits of establishing a community solar program that allows Georgia Power customers to purchase electricity from small-scale solar developers.

Will community solar drive down Georgia Power rates?

Proponents argue community solar would drive down rates overall at a time when the cost of being a Georgia Power customer is on the rise while boosting clean energy access to more Georgians. Photo contributed by Creative Solar

How can I support the development of solar power in Georgia?

Sign up now and get the opportunity to support the development of solar power in Georgia by subscribing to a portion of local solar farms. Every month you'll receive energy credits on your monthly bill based on the solar farm's production. Want to become a corporate sponsor? Help make renewable energy available to income-qualified customers.

Will Georgia Power build another 1,000 megawatts of solar energy?

Recently, state regulators approved Georgia Power's plans to build another 1,000 megawatts of solar energy capacity. Butler said the solar industry is seeking to expand the energy market in the most cost efficient way to deliver more power to the grid.

The projects will help to advance solar in the state as part of Georgia Power's Renewable Energy Development Initiative (REDI) program. The Whitfield Cooper, Gordon Pine Hall and Chattooga Gore project sites have a combined 17,160 solar modules that represent a total solar capacity of 7.9 MW DC.

Benefits of Solar Energy. Sunlight is one of Georgia's most abundant resources with an average of 218 sunny days per year. More than 3,000 MW of solar resources, or approximately 12% of our total capacity*, generate
