The 205 megawatt power plant, built near the northern Greek town of Kozani, can generate enough electricity to power 75,000 households and will reduce Greece's emissions of carbon dioxide by more than 300,000 tons per year. Its formal inauguration underscores the rapid growth of renewable energy projects in the country in recent years.

EcoSol brinda el desarrollo e implementación de soluciones tecnológicas para uso eficiente de la energía y el ahorro en el hogar, industria y comercio.

Greece's strategic position and climate characteristics offer important potential for all types of RES technologies. Wind and solar power plants represent the majority of installed capacity in Greece; however, small hydroelectric plants, biogas and biomass occupy a considerable market share.

Consult our latest infographic to get a quick overview of the country's RE capacity targets, a breakdown of the power mix, historical and expected PV capacity additions, the promise of storage, and the most remarkable recent solar deals closed in Greece.

According to a new report by industry association Solar Power Europe, Greece's total installed capacity last year grew by 20% with 1.6 Gigawatt of installed capacity added. By the end of the decade total installed capacity could more than triple to 29.6 GW, the report added, faster than projected under the Greek government's national energy ...

Greece installed 1.59 GW of solar in 2023, bringing its cumulative PV capacity to 7.1 GW by the end of December. It was the country's largest addition of solar capacity in a single year, up from...

ECO//SUN is the Exclusive Authorized Service Point of RENAC products in Greece. Solar Energy & Environment The know-how of ECO // SUN converts solar energy into electricity without contaminating soil, water, air, people, generally the entire environment!
