Who is bionic power?

Bionic Power Inc. is a Canadian, privately held company that has developed and holds IP rights on wearable technology. This technology addresses the rapidly growing market for mobility assistance in patients with knee pathologies.

How does Bionic power work?

Bionic Power produces one of the few energy harvesting exoskeletons in the world. Part of the idea is that the natural swing of the leg at the knee requires the leg to come to a stop. Why not harvest this energy? The PowerWalk; Kinetic Energy Harvester appears to be surprisingly small and flexible.

What is bionic power & amplify?

The earlier PowerWalk has been updated to the Amplify and continues to be developed in parallel. Bionic Power produces one of the few energy harvesting exoskeletons in the world. Part of the idea is that the natural swing of the leg at the knee requires the leg to come to a stop.

Who owns Bionic power & agilix?

A spin-off from Simon Fraser University, Bionic Power specializes in a knee brace that harvests power while walking. The power can be used to run small devices or recharge batteries. In December of 2021, the two companies, Bionic Power and Agilix have merged under BP, with a new CEO, Gualtiero Guadagni.

How does Bionic power's powerwalk work?

Bionic Power's PowerWalk generates an average of 12 Watts of power from walking on mixed terrain. The harvested power can be used to recharge batteries in the field. Company is private, with funding from angels and customers. Canadian Military, U.S Army, and DARPA have invested in the product development.
