

Les deux bâtiments qu'elle abrite sont fin prêts pour accueillir des porteurs de projet. Ce dispositif, unique en Guadeloupe, a été présenté mercredi.

Find solar panel locations in Guadeloupe through our Guadeloupe solar farm map. Analyze the main characteristics of solar farms in this country, sort these by capacity, panels area and landscape area.

La situation privilégiée de la Guadeloupe, qui présente des conditions climatiques particulièrement favorables avec environ 1 400 heures d'ensoleillement annuel, constitue un atout majeur pour la production solaire photovoltaïque. L'impulsion donnée par [...]

Sainte-Marguerite is the second ground-based solar farm combined with an agrivoltaic component to be built by Akuo in Guadeloupe. It was commissioned in 2011, and is located in Sainte-Marguerite, in the town called Le Moule, on Grande Terre island.

Reduce the land coverage of renewable energy plants while maximizing production through the development of technologies such as floating solar; Support agricultural players through the energy transition, by working closely with farmers for the development of our agrivoltaic projects.

Agrivoltaïsme, ombrières photovoltaïques, centrales solaires flottantes... Parcelle Solaire Guadeloupe est le programme de la société Eléments Caraïbes dédié aux propriétaires fonciers guadeloupéens qui souhaitent générer de nouveaux revenus en louant leur terrain pour y produire de l'électricité verte.

Sensible au développement durable et local, le groupe GBH a mis en place un vaste programme d'autoconsommation sur ses différentes enseignes. En Guadeloupe, plus de 13 000 m² de panneaux solaires ont été posés sur les toits de la galerie Destreland et Carrefour Grand Camp.

Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors of renewable energy and across Guadeloupe; Manage the development of the sector by selecting the solar photovoltaic projects that are the most beneficial for Guadeloupe

In Guadeloupe, more than 13,000 m² of solar panels have been placed on the rooftops of the Destreland shopping centre and Carrefour Grand Camp. A fifth installation of around 2,300 m² on the roof of Mr Bricolage Abymes will be in operation by the end of 2019.

Growth Potential of Solar Photovoltaics in Guadeloupe The PPE's Objectives for Solar Photovoltaics The

Guadeloupe solar panel plus farming

regional government's solar photovoltaics policies have several objectives: Ensure non-disruptive, coordinated, and managed development of solar photovoltaics that achieves a balance between sub-sectors [...]
