Three international firms have submitted their proposals to operate and maintain the 300 MW power plant to be used in the Gas-to-Energy project, set to be commissioned in 2025, alongside related auxiliary facilities.

4 &#0183; Dear Editor, When a country experiences years of power outages, there are solutions and strategies to mitigate and improve the situation. From my experience, the most important of them all remains the ability to urgently diversify away from the current situation. You cannot do the same thing over and over and expect a different outcome. [...]

THE Government of Guyana is actively working to enhance power supply across the country as the Christmas season approaches, with several major infrastructural developments already in progress to address citizens' concerns about reliable electricity.
