

# Hengli solar container factory operation

When did Hengli Heavy Industries 'future factory' start construction?

On August 15 last year, Hengli Heavy Industry's "Future Factory" started construction. Just five months later, this site of nearly 6 square kilometers was put into production. The first and second phases of Hengli Heavy Industries have been named "Ocean Factory" and "Future Factory," respectively.

Where is Hengli heavy industry located?

On January 28, the Hengli Heavy Industry Industrial Park, located in Changxing Island, Dalian, held a grand opening ceremony, marking that the idle assets that have been silent for 10 years have officially entered a new spring. Hengli Heavy Industry is building a world-class green shipbuilding and high-end equipment manufacturing.

How many ships does Hengli Heavy Industries build?

To date, Hengli Heavy Industries has started construction on more than 70 vessels, with orders scheduled through 2029. Upon reaching full production capacity, Hengli Heavy Industries will process 2.3 million tons of steel plates annually, becoming the world's largest and most comprehensive shipbuilding base.

Why is Hengli Heavy Industries called Ocean factory?

The first and second phases of Hengli Heavy Industries have been named "Ocean Factory" and "Future Factory," respectively. These names reflect Hengli Heavy Industries' vision of strengthening its maritime capabilities and pursuing the dream of becoming a maritime and manufacturing powerhouse.

What has Hengli heavy industry achieved in the second year?

In the second year of its full operation, Hengli Heavy Industry has achieved several major milestones, including the early delivery of its first constructed vessel, the successful delivery of its first engine, the launch of its first 306,000 DWT ultra-large crude carrier, and the commencement of construction on various other ultra-large vessels.

How many tons of steel can Hengli produce a year?

After the full production, Hengli Heavy Industry can realize an annual processing of 2.3 million tons of steel, and an annual production of 180 engines.
