

Honduras smarter grid international

Is the Honduran electricity grid interconnected with other countries?

The Honduran electricity grid is interconnected with the grids of its neighbors Nicaragua, El Salvador and Guatemala. However, the capacity of the interconnections is limited. It is expected to be expanded as part of the Central American Electric Interconnection System (SIEPAC) through a 230 kV transmission line with a capacity of 300 MW.

How much energy does Honduras generate a year?

In 2018, generation reached 1,625 GWh. It is now the main hydroelectric dam in Honduras contributing 16% of the generated energy to the national grid. Related articles: Thailand to boost floating solar on hydro dams
