Are public perceptions and knowledge gaps associated with solar energy in Texas?

(Rai & Beck, 2015) focussed on public perceptions and knowledge gaps associated with solar energy in Texas. They collected empirical data through a targeted survey dataset centered on solar energy perceptions and behaviors within the state. Their meticulous market.

How do we promote progress in the field of solar energy?

awareness levels, information gaps, cost considerations, the interplay of various elements, market segmentation, social influences, and behavioral change. Therefore, further promote progress in the field of solar energy. 1. Introduction In recent decades, the surge in energy demand has elevated energy consumption as a critical concern.

Should you choose a solar home lighting system or a traditional incandescent?

The findings unveiled that when presented with the choice between a solar home lighting system and a traditional incandescent one, 44% of respondents indicated a preference for the solar alternative. Furthermore, the research delved into the impact of consumers' perceptions regarding solar power on their purchase decisions.

Is solar energy a good investment for agriculture?

Leveraging solar energy within the agricultural sector has the potential to significantly decrease operational expenses. For instance, in the poultry industry, lighting, which are pivotal for maintaining production (Kumar et al., 2020; Ongeru & Mbataru, 2023).

How does attitude influence the adoption of solar technology in agriculture?

The usage intention, and facilitating conditions and trust in technology. Additionally, attitude partially mediated these relationships (except for self-efficacy), offering valuable insights into the adoption of solar energy technologies in agriculture, especially in regions with varying grid access. (Qamar et al., 2022) district.
