

Hungary solus energietechnik

Who is Solus advanced materials?

South Korea-based multinational technology firm Solus Advanced Materials is set to become the first in Europe to produce copper foils for use in electric vehicle (EV) batteries.

Does Hungary's investment aid to Volta energy solutions comply with EU state aid rules?

The European Commission has found Hungary's EUR 24 million investment aid to Volta Energy Solutions for the extension of a battery copper foil plant in the Hungarian region of Közép-Dunántúl (Central Transdanubia) to be in line with EU State aid rules. The aid will contribute to the development of the region, whilst preserving competition.

Will EBRD continue cooperation with Solus advanced materials?

We look forward to continued cooperation with the EBRD as a committed long-term partner." Solus Advanced Materials is set to become the first in Europe to produce copper foil electric vehicle (EV) batteries.

Copper foil supplier Solus Advanced Materials has started mass production at its second Hungary plant, the only one in Europe producing copper foil for EV batteries. Annual production is 23,000 tons and is in addition to the ...

South Korean copper foil producer Solus Advanced Materials Company announced this week that it has started mass production at a second copper foil plant in Hungary, as the company continues to...

Solus Advanced Materials will use a \$28 million loan secured from the European Bank for Reconstruction and Development (ERDB) to set up a manufacturing facility in Tatabanya in northwestern Hungary. The facility will produce copper foils to supply manufacturers of EV batteries in Europe thereby promoting a circular economy in Hungary and within ...

The European Bank for Reconstruction and Development (EBRD) on Monday announced a 28 million dollar loan for the construction of a plant by South Korea's Solus ...

Doosan Hungary's battery foil plant is Europe's only battery foil plant and is expected to be cost-competitive based on savings on logistics cost since it is near local electric vehicle battery manufacturers. It is also seen to have excellent competitiveness in quality stability.

The European Commission has found Hungary's EUR 24 million investment aid to Volta Energy Solutions for the extension of a battery copper foil plant in the Hungarian region of Közép-Dunántúl (Central Transdanubia) to be in line with EU State aid rules.

South Korean copper foil producer Solus Advanced Materials Company announced this week that it has
