

Industrial solar system cost Cyprus

Solar panels in Cyprus are used for residential, industrial and commercial properties. Other than home use, many businesses install photovoltaic panels in Cyprus for self-consumption. That is, they use the energy the photovoltaic system generates directly, but cannot store any excess energy for following months.

Our tailored commercial photovoltaic systems in Cyprus are based on a needs analysis, an assessment of the customer's consumption and on the estimation of the energy that can potentially be generated based on the space and sun exposure at the customer's premises.

Using photovoltaic systems to harvest the solar energy in Cyprus is a no-brainer. Learn how you can save EUR with solar panels via the Net Metering scheme Facebook

In Cyprus, a solar system typically pays for itself within 2 to 5 years, depending on the size of the system, electricity consumption, and government subsidies. Thanks to the high number of sunshine hours and the ability to save up to 80% on energy costs, ...

The government is developing a plan to install free solar power systems for vulnerable individuals, funded through a small charge on electricity bills. This initiative aims to ensure that every roof in Cyprus can utilize solar energy, particularly for those who cannot afford the initial investment.
