Why is Iran partnering with North Korea?

Iran and North Korea have developed a strategic partnership to address the challenges of U.S.-led sanctions and diplomatic and military containment efforts. Both countries are aligned with Russia and China to counter the U.S. and Western rules-based economic and political order.

Did North Korea send a top member of its parliament to Iran?

While North Korea is unlikely to disclose further details about the trip, it highlights the military cooperation between the two countries and their defiance of the U.S. over the years. North Korea last sent a top member of its parliament to Iran in 2019. [Read More: The World Must Keep a Wary Eye on North Korea](#)

Is North Korea fueling Iran's missile ambitions?

Summary - North Korea's Role in Fueling Iran's Missile Ambitions: The military cooperation between North Korea and Iran, detailed in a recent UN Security Council report, highlights a concerning trend in the exchange of long-range missile technologies and weaponry.

Why is the US concerned about North Korea's arms deals with Iran?

The United States has been greatly concerned by North Korea's arms deals with Iran, which started during the 1980s with North Korea acting as a third party in arms deals between the Communist bloc and Iran, as well as selling domestically produced weapons to Iran, and North Korea continues selling missiles to Iran.

Do Iran and North Korea have a missile relationship?

The two US adversaries have a long history of missile cooperation. Iran acquired Scud missiles from North Korea during the Iran-Iraq War in the 1980s and it went on to acquire the North Korean Nodong and Musudan systems in the 1990s and 2000s, respectively.

Could North Korea benefit from Iran's oil?

Energy-strained North Korea could benefit from Iran's oil and might be looking to acquire drones like those Tehran has sent to Russia, arms experts Lami Kim said, adding Iran's nuclear program could receive a boost from North Korean technology.

In April 1973, Iran established diplomatic relations with North Korea, a decision that Deputy Foreign Minister Ahmad Mirfendereski justified on the grounds that "keeping the North Koreans isolated would not serve a useful purpose; on the contrary, bringing them more fully into the diplomatic world would make them behave more responsibly."

The maximum power of the blast of the aforementioned tests can be estimated to be up to 40 kilotons. However, a lot of sources claim that yield did not surpass 10-15 kilotons. Noteworthy ...
