JBD BMS 24V/100A Features: Over Voltage Protection: the BMS stops the charging current while still allowing loads to draw power. Under Voltage Protection: ensures ...

So I'm new to the DIY battery world and had a few questions on what some more experienced users would think would be a good architecture for communicating with several JBD-SP10S009 BMSs at once. These were the only ones I could find in stock (I don't use alibaba or those types of sites) and they only have 1 UART port to connect to.

I have not been able to find your exact BMS model instructions online, but I did find a PDF I had downloaded a while back for a JBD-SP10S009 version. I can't promise that this is correct for your BMS, but it should not hurt anything if it is wrong. The worst case is it will show cell voltage errors. It does not show shorting any pins together.
