If your solar PV system generates more than you can use or store. You can export any surplus electricity back to the grid, and we will pay you for it through our Buy Back Tariff. But as there are no Government subsidies in Jersey, ...

We're partnering with local businesses, landlords and government departments to find sites for us to design, build and operate high-performing solar PV arrays to feed the grid. We also help local businesses and individuals who wish to install their own solar arrays, and we'll buy any surplus power back from them through our Buy Back tariff .

Whether you are planning on "going solo" away from the electricity grid, living the dream in a beautiful remote cottage, or simply like the green-living idea, we can provide you with the perfect off-grid solar solution to meet your electrical power needs.

We managed to maximise the roof space for the Fusion Flat Fix mounting system which provided just under 5kw system, paired with an off-grid inverter and DC coupled battery to ensure they were able to use stored electricity for nighttime.

Solar Photovoltaic (PV) provides extra on-site electricity, ensuring your regular connection to the power grid. Daylight powers your panels, offsetting grid electricity purchases, saving you money. Excess power automatically sold to the grid earns you credits, reducing your utility bill.

Sell electricity back to the grid. If your system is producing more electricity than you need, you can sell the surplus back to the grid through buy back tariff. Cut your carbon footprint. Solar electricity is green renewable energy and doesn't release any harmful carbon dioxide or other pollutants. A typical home solar PV system could save ...

If your solar PV system generates more than you can use or store. You can export any surplus electricity back to the grid, and we will pay you for it through our Buy Back Tariff. But as there are no Government subsidies in Jersey, such as the Feed-In Tariffs (FITs) that used to exist in the UK, the rate you will receive off Buy Back is purely ...

When you install solar panels on your property, your existing JE electricity supply will remain in service. This allows you to draw from the grid when your system is not producing all the power you need and send power

back to the grid when you produce more energy than you use.

A solar battery is required for storing backup electricity in case you wish to go off-grid. However, it is also important to connect the inverter to the grid. For this process, the installers use a normal plug to connect to the main power switchboard.

The best off-grid solar systems AcoPower, Renogy, and WindyNation top Forbes Home"s best off-grid solar systems 2024 list. AcoPower scored 4.7 out of 5 stars when reviewed against our...
