

The company said on Monday that the energy storage system, which is in Jordan with 23MWp output and 12.6MWh storage capacity, achieved its commercial operation date (COD).

The electrical storage project will have a power capacity of at least 30MW, with an energy capacity of 60MWh, which will primarily be used for controlling photovoltaic (PV) solar and wind energy. The project will be the first phase of electrical storage in Jordan.

This project includes an expansion of 11 MWp which consists of approximately 34,350 of Philadelphia Solar PV panels (320 Wp each), a tracking system which is locally made by Philadelphia Solar, and a 12.6 MWh Lithium Ion energy storage system (Tesla Powerpack).

Jordan-based Philadelphia Solar announced on Monday it has reached financial close on a 11-MWp solar project with energy storage in Jordan.

First Middle Eastern utility-scale solar-plus-storage plant comes online The 23 MW/12.6 MWh facility is near Mafraq, in northern Jordan. The storage system will offer peak shaving to...

Philadelphia Solar, a vertically-integrated PV company headquartered in Jordan, said this morning it has reached financial close on a project to bring battery storage to a large-scale solar farm in the Middle East kingdom.

This project includes an expansion of 11 MWp which consists of approximately 34,350 of Philadelphia Solar PV panels (320 Wp each), a tracking system which is locally made by Philadelphia Solar, and a 12.6 MWh Lithium Ion energy ...

Pilot project for a 30/60 MWh battery storage facility, Jordan Thanks to the country's rapid expansion of solar photovoltaics (PV) and wind energy, Jordan has established itself as a trailblazer for the transition to renewable energies in the Middle East.

Jordanian PV panel maker Philadelphia Solar has announced completion of the largest solar-plus-storage power plant in the MENA region. The 23 MW/12.6 MWh facility is near Mafraq, in...

PV panels (320 Wp each), tracking system which is locally made by Philadelphia Solar, and a 12.6 MWh Lithium Ion energy storage system (Tesla Powerpack).

The company said on Monday that the energy storage system, which is in Jordan with 23MWp output and 12.6MWh storage capacity, achieved its commercial operation date (COD). It represents the second expansion phase of the project, which Energy-Storage.news reported as it reached financial close in May 2018 .
