Kenya will keep expanding geothermal energy, but it is also exporting technical knowledge about electricity and green energy to countries across Africa. The European Investment Bank is one of the biggest supporters of Kenya's geothermal operations, having made several big investments since the 1980s.

It is expected to mobilize at least an additional \$243 million from the public and private sectors through implementing partners--the African Development Bank and the World Bank Group. Currently, the share of renewable energy in Kenya is almost 90 percent - including 45 percent geothermal and 26 percent
