What is the Lesotho electricity project?

The project aims to increase access to electricity within Lesotho. This will be achieved by grid extension to industrial areas and households in peri-urban areas. The project will also promote private sector participation in the provision of electricity to underserved rural communities through deployment of mini-grids. Objectives

How can Lesotho improve electricity access?

Increase electricity access to households, schools and enterprises in Lesotho. -Provide reliable and affordable electricity through renewable energy sources to Basotho. -Provide training on entrepreneurship and productive uses of electricity for vulnerable women and underserved rural communities.

What is renewable Lesotho?

Renewable Lesotho brings together a toolbox of instruments, including: Infrastructure development: supporting a pipeline of projects ranging from off-grid solutions, mini-grids, solar home systems, to potential larger investments in hydro-, solar, including floating solar, wind energy, and transmission.

How much electricity does Lesotho produce?

Lesotho produces about 72 MW from hydropower (Meula). It has about 150 MW peak power and imports more than 70 MW mainly from Mozambique (29% of peak demand) and 20% of its peak demand from South Africa. The electricity supply accounts only for +/-50% in the energy mix.

Can Lesotho become an energy exporter?

Energy independence /Lesotho can meet its own energy needs and potentially become an exporter of clean energy, setting an example for the entire region, and reducing its current energy import bill.

Who is responsible for Energy Management in Lesotho?

According to SE4ALL report for Lesotho, The Ministry of Natural Resources through the Department of Energy is responsible for the overall administration and coordination of energy in Lesotho.

A joint initiative to increase clean energy generation and energy efficiency in the Mountain Kingdom, Renewable Lesotho promotes reliable and equitable access to energy, while improving energy sector leadership and capacity.

A website of the Department of Energy (DoE) in Lesotho with an Energy Management Information System (EMIS). The website gives all information about renewable energy, electrification generation, transmission and consumption, petroleum, energy efficiency, solar, bio ...

The ERC endeavors to conduct studies in energy efficiency and sustainable renewable energy to identify suitable technologies for Lesotho's needs, develop capacity to assess and implement related projects and
