

Libya iqony solutions

Who is iqony solutions?

Iqony Solutions provides customized responses to the challenges of the energy transition. As a partner for all the issues related to decarbonization and digitalization, we support our customers with engineering expertise.

What does iqony do?

With 85 years of experience in the planning, construction and operation of energy facilities, the company provides holistic solutions for the decarbonization, decentralization and digitalization of the energy supply. Iqony focuses on renewable energies and bridging technologies that can be used in a climate-neutral way now and in the future.

What services does iqony offer?

In addition to solar, wind and geothermal energy, the portfolio includes hydrogen solutions, storage technologies, engineering services and gas-fired power plants. Specializing in tailor-made solutions for complex challenges, Iqony draws on its broad and in-depth knowledge of the energy industry across the full range of technologies and services.

Why should you choose iqony solutions?

As a partner at your side, Iqony supports you with the challenges from the transmission network to the industrial network. Iqony Solutions offers customized solutions for the challenges of the energy transition. As a partner for all topics relating to decarbonization and digitalization, we support our customers with engineering expertise.

How many employees does iqony have?

Around 2,600 employees worldwide implement projects for major industrial companies, utilities, cities and municipalities in numerous countries across the globe. Specializing in tailor-made solutions for complex challenges, Iqony draws on its broad and in-depth knowledge of the energy industry across the full range of technologies and services.

Iqony has been active in energy generation for 75 years and offers its customers integrated solutions in the fields of power and heat generation and in technical services. Our core competencies include planning, implementation and operating of both large power plants and distributed energy facilities, along with asset-based power trading.
