

Will elevenes source lithium materials from Serbia?

Asked about whether the company intends to source lithium materials from Serbia, founder and CEO Nemanja Mikac told Balkan Green Energy News that the plan is to import the commodities. ElevenEs requires lithium iron phosphate for cathodes, he stressed. Mikac noted that Rio Tinto's project is on hold in Serbia.

Where is the lithium project located?

Of note, the last one, which has the same name as a town in the northeast of Serbia, is actually in the country's southwestern part. The Lopare project (early stage) is in Bosnia and Herzegovina. The areas under lithium exploration and those envisaged for exploration mostly have very fertile land and the population depends on agriculture.

How many lithium projects are there in Europe?

As for lithium, there are 20 projects in Europe, of which eight are in Serbia! Rio Tinto's Jadar endeavor, which is formally suspended, is marked as the only one in the feasibility stage. Radusa, Valjevo, Kosjeric, Rekovac, Vranje-South, Badanja and Bela Crkva are in the early stages of development.

Should Bosnia join the EU?

Bosnia is a candidate to join the EU. Lopare is a deposit with "low content" lithium that nevertheless remains "interesting", said Rudic, noting that the larger presence of magnesium and boron guaranteed the mine's future "stability".

Why is the Barroso Lithium mining project being delayed?

The article points to the delays at the Barroso lithium mining project in northeastern Portugal. The investor, Savannah Resources, is struggling to get around administrative barriers and the resistance among environmentalists and the local population. The report highlighted the data obtained from S&P Global on mining projects throughout Europe.

Where is the biggest lithium cluster in Europe?

The map shows the biggest cluster is in the central part of the Balkan peninsula. It spans Serbia, Kosovo*, Albania, North Macedonia and the western part of Bulgaria. Vulcan Energy is developing the technology to extract lithium from geothermal water. As for lithium, there are 20 projects in Europe, of which eight are in Serbia!

Serbia is preparing to give the green light to Rio Tinto for the development of Europe's largest lithium mine, two years after Belgrade halted the project. President Aleksandar Vucic stated that the "new guarantees" from the Anglo-Australian mining company and the European Union (EU) appear ready to address Serbia's
