What is Northvolt labs?

Home to our battery R&D and cell development projects, Northvolt Labs is a campus of facilities to drive innovation in battery technologies. From materials science, battery R&D and cell manufacturing, to full validation facilities and customer meeting spaces, at Northvolt Labs we have it all in one place.

Will Northvolt build Europe's largest lithium-ion battery factory?

With the mission to enable the transition to renewable energy and electrification, Northvolt in March 2017 launched its plan to build Europe's largest lithium-ion battery cell factory. During the past 12 months significant progress has been made towards achieving the goal.

What can Northvolt labs do for You?

From materials science, battery R&D and cell manufacturing, to full validation facilities and customer meeting spaces, at Northvolt Labs we have it all in one place. At Northvolt Labs we run cell development projects.

What is Northvolt battery systems?

Driven by customer demand, a unit called Northvolt Battery Systems has been established - a team dedicated to developing complete battery systems, which includes cells, battery, data management systems and thermal control functions, for key customer segments. The first battery module prototype was completed in February of this year.

Where is Northvolt launching a battery factory?

After conducting an in-depth assessment spanning over six months of ten potential factory locations in Sweden and Finland, Northvolt announced a partnership with two Swedish municipalities for the establishment of Northvolt Labs in Västerås and Northvolt's first large-scale battery factory in Skellefteå.

Is Northvolt a priority for Chinese battery manufacturers?

A particular focus is on Asian battery makers, including Chinese manufacturers such as CATL. Pan Jian, CATL's co-founder, told the Frankfurter Allgemeine Sonntagszeitung at the weekend that investing in Northvolt was "not a priority", but that there was a "possibility that we can help them on the production side".

Northvolt outlines plans for expansion of Northvolt Labs into world's first R&D campus covering the entire battery ecosystem. June 2021 Northvolt raises \$2.75 billion in equity to finance expansion of Northvolt Ett to 60 GWh

The start-up's crown jewel, according to several former executives, is not the Skellefteå plant but its research and development facility, known as Northvolt Labs, in Västerås, close to ...
