

Midsummer company Anguilla

Who is Midsummer solar?

Midsummer is a Swedish solar energy company that installs discrete solar roofs that we manufacture in Anguilla with 90% lower carbon footprint than traditional solar panels. We have a high-tech, Swedish product and own the entire value chain from development and production to installation.

What does Midsummer do?

Midsummer is a company that manufactures and distributes solar energy equipment. It offers machines for mass production of CIGS (copper, indium, gallium, and selenium) solar cells, batteries, energy storage, accessories, etc. Midsummer has 5 employees at their 1 location and kr53.38 m in annual revenue in FY 2022.

Why is Midsummer a sustainable company?

Midsummer's sustainability efforts are based on our desire to reduce the environmental impact of the production of solar roofs. A third-party-reviewed lifecycle analysis shows that Midsummer's solar roofs generate almost 90% lower carbon footprints than traditional solar panels thanks to our efficient production systems.

Who is Midsummer machinery?

Under the Midsummer Machinery brand, we supply production systems for flexible thin-film solar cells. Midsummer was founded in 2004 with the desire to transform the world's most climate-friendly energy source into usable energy for everyone.

Does Midsummer provide supply & design support?

Midsummer provides supply and design support through its software Easy PV. Easy PV was developed to help solar installers with project design, optimisation of solar energy set-up and one-step full kit purchase.

How many employees does Midsummer have?

Midsummer has 5 employees at their 1 location and kr53.38 m in annual revenue in FY 2022. See insights on Midsummer including office locations, competitors, revenue, financials, executives, subsidiaries and more at Craft.
