

In a significant move towards renewable energy, Montenegro's Crnogorski Elektroprenosni Sistem (CGES), the majority state-owned power transmission system operator, has inked a deal with local enterprise, EE Korita. The agreement is an ambitious step towards the construction of a robust infrastructure necessary to connect a 240 MW solar power ...

Montenegro's transmission system operator, CGES, has signed a crucial contract to connect an 87.5 MW solar power plant to the national grid, marking a significant step towards enhancing the country's renewable energy production and reducing dependence on fossil fuels

Montenegro's CGES signs grid connection for a \$200M, 240 MW solar project by EE Korita, backed by European Energy, boosting national renewable capacity.

Montenegro also has a list of priority infrastructure projects, including energy. It was introduced in 2018 and updated in the meantime. Compared to the list from 2021, the Gvozd wind farm and the ecological reconstruction of the Pljevlja thermal power plant were erased, while the following projects were added: HPP Krusevo, Krupac solar power plant, decarbonization and ...

Over the period of one year Montenegro often has over 240 sunny days, thus the use of solar systems is the most ideal, most efficient and cleanest way to obtain energy. The intensity of solar radiation is among the highest in Europe, which ...

Montenegro's transmission system operator, CGES, and Cetinje-based M Energy have signed the first agreement on connecting a planned solar power plant of 385 MW to the grid. The value of the project is around EUR 300 million.

Montenegro's commitment to sustainable energy development through solar and wind projects showcases its determination to reduce greenhouse gas emissions and transition to a greener future. By exploiting its natural resources and embracing renewable energy technologies, Montenegro is well on its way to achieving its clean energy targets and ...

Montenegro has significant potential in the field of renewable energy sources, announced President Jakov Milatovic. He emphasized that there is interest from international investors, especially in solar energy, which has not been fully utilized in our country so far.

Montenegro's power transmission system operator CGES has so far signed six connection agreements for solar power projects. Their total peak capacity would amount to 1.64 GW in peak capacity. The investors are M Energy, Sun Horizon, Obnovljivi izvori energije, Solar Power, EE Korita and Agenos Energy

Montenegro renergy solar

Construction of a Solar Power Plant in Montenegro with a total capacity of up to 385 MW The Project site is located in central region of Montenegro in the area of Chevo which lies on the border between Cetinje and Niksic municipalities, 68km away from Podgorica and 101km away from the Port of Bar.

Over the period of one year Montenegro often has over 240 sunny days, thus the use of solar systems is the most ideal, most efficient and cleanest way to obtain energy. The intensity of solar radiation is among the highest in Europe, which creates ideal conditions for a serious energy transition by introducing solar thermal collectors and ...
