

My energy libbi Saint Martin

Myenergi Ecosystem - Integrates with your myenergi devices, prioritising power to your home, eddi or zappi.
Ultimate Control - The libbi gives you the option to charge solely from solar or through the grid or a mixture of the 2. It also has the capability to optimise grid ...

More energy deals with NO standing charges finally on the cards following Martin Lewis' calls for action - here's what's happening. Energy suppliers will need to offer tariffs with low or no standing charges under new plans to tackle the issue of high standing charges, which make up over £330 of most people's annual bills.

How do I work out the time it will take to charge libbi? How does libbi work with Octopus' Agile Tariff?
How to Set a Timed Boost on a libbi Using the myenergi App

This kit contains one 5kW hybrid inverter, two 5kWh batteries and a controller to deliver fantastic management of your energy independence. Remotely monitor all your myenergi devices, and import and export to and from the grid as and when you need to with the myenergi Libbi energy storage ecosystem. Key features:

Ensure you have enough home solar storage with this myenergi Libbi modular battery. It's designed for seamless integration with other myenergi devices and can be scaled up as your needs grow with up to four batteries in parallel.

libbi is a modular battery system that adapts to your needs. We created libbi to store your electricity, to use it when you need it most. It allows you to capture as much surplus solar electricity as possible, whilst integrating with your existing myenergi devices.

A modular home battery storage system that adapts to your needs. We created libbi to store your electricity, to use it when you need it most. It allows you to capture as much surplus solar electricity as possible, whilst integrating with your existing myenergi devices. libbi is ...

The myenergi libbi is a state-of-the-art home battery storage system that harnesses the power of renewable energy sources, such as solar or wind, to provide reliable, clean, and cost-effective power for your home.

Connect your new solar array directly to your battery with no additional inverter needed! Optimise your time of use tariffs, to store energy for use in more expensive periods. Add a battery to your existing solar array; your existing inverter can be replaced. Expansion of a solar without the need for an additional PV Inverter.
