What does CESA do?

CESA's mission is to make energy storage a mainstream resource. We strive to advance a more affordable, efficient, reliable, safe and sustainable electric power system for all Californians. Stay updated with the latest developments in the energy storage industry.

Why should you join CESA?

This rapid expansion strengthens California's ability to capture clean energy during off-peak hours and dispatch it during peak evening demand, enhancing grid stability and minimizing reliance on fossil fuel generation. opportunities in the storage industry. Join CESA to build relationships with our 90+ members,

Is California making progress in energy storage deployment?

We are excited to share the release of the updated Energy Storage Survey, showcasing California's remarkable progress in energy storage deployment. The state has added over 3,000 MW of battery storage capacity in the last six months alone, bringing the total to more than 13,300 MW - a 30% increase since April 2024 (Source).

A Long Duration Energy Storage (LDES) study was published December 2020 at the California Energy Storage Alliance (CESA) website (1). Energy storage longer than four hours is needed for reliability at night, during evening peak demand, and during intermittent solar generating periods.

Installed battery storage capacity in California has grown from just 500MW in 2018 to more than 13,300MW at the latest count. According to the newest Energy Storage Survey published by the California Energy Commission (CEC), as of 11 September 2024, there is 13,391MW of cumulative battery storage capacity in the US state.

Shape the California energy storage market with CESA. Access experts, network with industry leaders, and stay informed on the latest developments. Join us in advancing a sustainable power system for all Californians.

California Energy Storage Alliance (CESA) is a 501c(6) membership-based advocacy group committed to advancing the role of energy storage in the electric power sector. At 100+ ...

A Long Duration Energy Storage (LDES) study was published December 2020 at the California Energy Storage Alliance (CESA) website (1). Energy storage longer than four hours is needed for reliability at night, during ...

Discover the diverse organizations that make up CESA's dynamic coalition, driving innovation and growth in the energy storage industry. CESA members are the leaders of the energy storage industry. Our membership includes technology manufacturers, project developers, systems integrators, electrical contractors, software developers ...

Installed battery storage capacity in California has grown from just 500MW in 2018 to more than 13,300MW at the latest count. According to the newest Energy Storage Survey published by the California Energy ...

In recent years, energy storage has emerged as a key technology that can address these issues. Energy storage can enable the deployment and integration of renewable energy, reduce local human health and climate impacts from fossil fueled generators, ease energy cost burdens, and increase community energy independence and resilience.

California Energy Storage Alliance (CESA) is a 501c(6) membership-based advocacy group committed to advancing the role of energy storage in the electric power sector. At 90+ members strong, CESA is the definitive voice of energy ...

California Energy Storage Alliance (CESA) is a 501c(6) membership-based advocacy group committed to advancing the role of energy storage in the electric power sector. At 90+ members strong, CESA is the definitive voice of energy storage in California and the West.

California Energy Storage Alliance (CESA) is a 501c(6) membership-based advocacy group committed to advancing the role of energy storage in the electric power sector. At 100+ members strong, CESA is t
