

Nepal trio solar

Is solar power a viable alternative source of energy in Nepal?

As an alternative source of energy, solar power is gaining popularity across the globe as well as in Nepal. Although the major investments for electricity production have flowed towards hydropower projects in Nepal, investors in solar projects have increased in recent years.

How many MW of electricity will Nepal produce in 10 years?

The government of Nepal has set the target of producing 15,000 MW of electricity in the next ten years. Understanding the concept of 'energy mix', the government has emphasized that the contribution of solar or renewable energy should be around 10-15 percent. Previously, the solar power was used only for household purposes.

How many solar projects are being built in Nepal?

According to the Department of Electricity Development, about 17 solar projects are currently being constructed in Nepal. NEA along with private sector investors are developing these projects. The department has already issued the license for the construction and the work on these projects is going on full swing.

Along with other programs and projects, AEPC is executing a project "Promotion of Solar Energy in Rural and Semi-urban Regions of Nepal" with financial assistance from the Federal ...

Proposals received for the development of 800 MW of grid-connected solar in Nepal equal more than four times the available capacity under the tender, according to new figures from the NEA.

At Nepal Solar Farm Limited, we are dedicated to facilitating faster adoption of renewable energy technologies across Nepal with an end goal of global sustainability. We visualize a Nepal whose energy sourcing is revolutionized using sunlight, wind and other clean energies.
