

New solar container fire fighting

How can a hydroPen system fight a container fire?

Finally, there's a faster, safer and more efficient way to directly fight container fires on board vessels. The HydroPen system makes it possible to directly extinguish container fires at heights, at deck and below deck on board cargo vessels. No other solution can do that.

Should you upgrade your container firefighting equipment?

Regardless of containership 'built age', upgrade your fleet's container firefighting equipment to not less than the SOLAS Chap. II-2, Reg. 10, requirements for the provision of a self-penetrating water mist lance and mobile water monitors.

Are energy storage systems a fire risk?

Energy storage systems (ESS) are designed to store and release energy on demand. While they have many benefits, they can also pose a fire risk if not properly designed, installed, and maintained. Therefore, fire protection is an important consideration when it comes to energy storage systems.

Do cargo/container ships need a fire alarm system?

Para. 4 requires cargo/container ships to be fitted with fixed fire detection and automatic alarm systems in machinery spaces and fire detection, alarms and sprinkler systems in accommodation spaces. As to cargo/container holds, Reg. 7 provides no specific detection and alarm requirements.

Are shipboard container cargo fires a hazard?

Shipboard container cargo fires with severe losses are regrettably common. The first line of defence (as discussed in Risk Bulletin No 86) must always be pro-active fire risk identification and avoidance. This Risk Bulletin focuses on the second and third lines of defence of fire detection and firefighting.

FFS has developed versatile container solutions for marine and onshore applications. Lightweight, compact, and readily available - our Container Systems, based on a 10-foot ISO standard, feature ...

In recent years, several fire incidents involving energy storage systems have occurred across various countries and regions, resulting in property loss and posing serious threats to ...

In this comprehensive guide, we will explore the HydroPen system's features, applications, benefits, and technical specifications, ensuring you have all the information you need to ...

Design mobile or roll-off fire training containers that can be deployed to remote training areas or shared between fire departments.

Solar Storage Container Market Growth The global solar storage container market is experiencing explosive

New solar container fire fighting

growth, with demand increasing by over 200% in the past two years. Pre-fabricated ...

This system is realized through the unique combination of innovative and advanced container technology. Our pioneering and environmentally friendly solar systems: ...

Abstract This work presents the implementation of an autonomous fire-fighting smart robot designed to extinguish fires autonomously in the fire-fighting sector. They may carry out ...

After a seemingly "benign" period, we have seen several serious container ship fires lately, including a large one leading to tragic loss of life. ...

In particular, for container carriers engaged in a wide variety of cargo transportation, considerations for installing detection and fire-fighting ...

While the basic SOLAS requirements are incorporated by reference in the ABS Rules for Building and Classing Marine Vessels (Marine Vessel Rules), this Guide has been developed to provide for further ...

The combination of the HydroPen and the lift enables the ground-breaking feature of reaching containers at fire at heights and to fully automatically extinguish the ...

Unlike standard containers, TLS Energy's BESS containers are equipped with essential components such as HVAC systems, fire fighting systems, and efficient lighting. This integration ensures that the ...

Periodical fire patrols provided with portable thermal sensors and UHF radios are to be carried out in accordance with approved fire training procedures. At least two portable thermal sensors for fire ...

Fire Fighting Systems (FFS) is the global leader in the design, engineering, and manufacturing of large firefighting systems - a single-source supplier for both ...

Implementation of new and improved measures to fight fires on container vessels will not only protect the vessel and the cargo, but also the lives and wellbeing of the crew.

Among the issues driving container ship fire exposures are the adequacy of fire-fighting capabilities and ongoing problems with misdeclaration of cargo.

This document provides guidelines for fire-fighting systems for cargo areas on container carriers. It outlines requirements to obtain notations indicating ...

Unfortunately, container fires are usually born of different fuels, and that causes much bigger problems. The risk of a container fire occurring is ...

New solar container fire fighting

Fire Suppression in Battery Energy Storage Systems
What is a battery energy storage system? A battery energy storage system (BESS) is well ...

Lithium-ion battery fires are "deep-seated", as the materials involved in the ignition and propagation of the fire are tightly integrated into a cell, making fire-fighting a ...

IMO work to improve and amend fire-fighting detection & control regulations for large container ships continues. New regulations for newly ...

What is a container fire-fighting strategy? The whole container fire-fighting strategy was divided into battery module level, battery cabinet level, and battery container level. New fire extinguishing agents ...

The IMO has amended SOLAS regulation II-2/10, introducing new requirements for fire protection of on-deck cargo areas. The requirements apply to new ships constructed on or after 1 ...

At SEAC's May 2023 general meeting, IAFF's Sean DeCrane gave a presentation on mitigating energy storage system (ESS)-related fire risks.

And just last week, the container ship YM Mobility suffered severe explosions and fire onboard while it was docked in Ningbo, China. Why are ...
