

The European Bank for Reconstruction and Development (EBRD) has announced that North Macedonia's state-owned power utility, ESM, has initiated a tender process for the construction of two new solar power plants, with a total combined capacity of 30 MW.

The results of the study are unambiguous: North Macedonia has an enormous untapped potential for renewable energy development. Even when completely excluding all important bird and plant areas, the potential comes to ...

North Macedonia launches 100 MW solar tender Utility ESM is seeking potential partners for the construction of two 50 MW solar facilities at its shuttered coal power plant near Kicevo....

Solar photovoltaic (PV) panels have been installed on the rooftops of the 108 public buildings under the Government of North Macedonia's project. The EUR 20.6 million investment is planned to pay off in 7.5 years and reduce CO2 emissions and energy costs.

North Macedonia spent less than EUR 120 million to mitigate the effect of the energy crisis, Minister of Economy Kreshnik Bekteshi said. He revealed the government is about to change the rules to allow a bigger capacity of rooftop photovoltaic systems for ...

North Macedonian electricity producer ESM has launched a tender for the design, procurement, construction, commissioning and handover of two solar plants totaling 30 MW.

The simplified procedures, proposed through amendments to North Macedonia's construction law, will apply to solar systems of up to 6 kW on individually owned buildings and up to 40 kW on buildings owned by legal entities. Citizens and companies will no longer need approval from the municipality to install a solar plant

The government of North Macedonia has recently improved the net metering scheme for solar installations and has launched a EUR1 billion rebate scheme to support the deployment of rooftop PV ...

The potential for solar energy development in North Macedonia is vast. With estimates suggesting that the country could harness up to 11 GW of solar PV capacity, there is significant room for growth. Utilizing rooftops and degraded lands for solar installations can further enhance this potential, allowing for efficient land use while minimizing ...

The Prime Minister of North Macedonia announced that the Ministry of Economy of North Macedonia ("Ministry") is currently working on a law which will ease the procedure for installation of photovoltaics on the roofs of households and industrial objects. This demonstrates North Macedonia's commitment to the

North Macedonia roof solar

country"s transition to ...
