

Novali energy Jordan

What is a Novali battery?

novali's high voltage lithium-metal batteries provide breakthrough performance in charging speed, range, sustainability and cost efficiency. novali engineers and builds customized battery systems for mobility and stationary storage applications Let's share some energy!

Are Novali battery cells better than traditional lithium-ion batteries?

Our performance Using traditional lithium-ion batteries as a baseline, novali battery cells promise approximately twice the range, twice the charging speed, and can be acquired at a significantly lower cost. In addition, our cells offer enhanced safety and sustainability characteristics.

How do I contact Novali energy?

The company's battery systems are modular, scalable and used in electric vehicles, stationary storage and off-grid power units, enabling ...

The signed memorandum of understanding between Belgium based battery company Novali and industrial automation solution supplier Mitsubishi Electric Europe B.V. demonstrates quite how soon that agreement may be realized. Novali was set-up to finance and deliver multiple "giga factories" across Europe, with production scheduled to start in 2025.

Using traditional lithium-ion batteries as a baseline, novali battery cells promise approximately twice the range, twice the charging speed, and can be acquired at a significantly lower cost. In addition, our cells offer enhanced safety and ...

Novali stands at the forefront of the battery technology landscape, pushing the boundaries with their innovative next-generation high-performance and sustainable batteries. As a beacon in the automotive and stationary storage sectors, Novali's commitment to a ...

Novali energy Jordan

Novali specializes in next-generation battery technology within the energy sector. The company offers high-performance, sustainable battery cells and custom storage systems designed to enhance charging speed and energy efficiency.

The signed memorandum of understanding between Belgium based battery company Novali and industrial automation solution supplier Mitsubishi Electric Europe B.V. demonstrates quite how soon that agreement may be realised. Novali was set-up to finance and deliver multiple "giga factories" across Europe, with production scheduled to start in 2025.

The company's battery systems are modular, scalable and used in electric vehicles, stationary storage and off-grid power units, enabling businesses and governments to transition to a cleaner energy future.
