

Orange Botswana is the second largest telecommunications company operating in Botswana. Established in 1998, Orange Botswana is a subsidiary of the Orange Group, a leading telecommunications corporation based in France.

Orange was the first mobile operator to launch 4G LTE services over B3 (1800 MHz) in February 2015 and continued to expand its 4G coverage in 2016, which reached 30% at the end of that year. The company operates a 10 MHz LTE channel permitting peak data rates of 50 to 75 Mbps.

The use of the VRF system was the first of its kind in a data centre environment in Botswana. The system uses high efficiency inverter compressors and DC fan motors. The power consumption is monitored internally with on-board electronics including current transformers (CT"s) to ensure stable and efficient power consumption.
