Las Bahamas están comprometidas con la transición hacia fuentes de energía más limpias y sostenibles. Con un objetivo de lograr una dependencia mínima del 30% de energía renovable para el año 2030, se están llevando a cabo estudios de casos de energía solar para desarrollar un Plan Integrado de Recursos y Resiliencia.

For many homes, the electricity bill makes up a large portion of the expenses so when the energy costs are cut, money will be saved. In addition, the rising energy costs make the transition to solar energy a no brainer for so many homeowners. Even a smaller solar panel for hot water can produce significant savings for the average household.

Up to 1000 W per panel. We use the latest inverter technology and highest efficiency solar panels to give you the best return on investment possible and a system that will work for at least 25 years. Our figures show that you will multiply your investment during this time by ten!

Whether your solar panels are for your home or commercial installation, and will be connected to the grid

Paneles solares uso domestico Bahamas

through net metering, or completely off the grid, employing local Bahamas solar panel installation experts will ensure your satisfaction and provide for quick follow-up and maintenance.
