

Peninsula energy solutions Cook Islands

What is Peninsula Energy?

Peninsula Energy is an ASX-listed uranium mining company that commenced in-situ recovery operations in 2015 at its 100% owned Lance Projects in Wyoming, USA. The company is embarking on a project transformation initiative at the Lance Projects to change from an alkaline ISR operation to a low-pH ISR operation.

Who is Pacific Energy Group?

The Pacific Energy Group became established in the Cook Islands in 2010 thanks to the acquisition of the BP assets. Ever since, the Group has renewed its partnership with the power plant TAU and equipped itself with a new refueler to support the business growth. Optimization and quality of supply are also a priority.

Why do Cook Islands residents need a full-time power system?

And with local residents trained during the installation process, the community is empowered to maintain and operate the systems themselves. Now with full-time power, the future has taken a new shape for Cook Islands' residents - an improved quality of life, and increased economy activity.

Is full-time power the future of Cook Islands?

Now with full-time power, the future has taken a new shape for Cook Islands' residents - an improved quality of life, and increased economy activity. The improved livelihood in the communities that now have the benefit of reliable, 24-hour power supply is immeasurable.

How did we help the Cook Islands Government achieve its aim?

We helped the government realise its aim. To support the Cook Islands Government, the New Zealand Government - through the Ministry of Foreign Affairs and Trade, installed mini-grid photo-voltaic power systems in a number of villages on six remote islands. We helped manage this logistically enjoyable project.

Why is there no electricity on the islands?

Bad weather and other events often prevent goods arriving on the islands. Previously, electricity was provided by diesel generators, usually for around 12 hours per day. Power supply was effected by issues of reliability, maintainability, capacity and access to adequate, regular diesel supplies.
