

# Pitcairn Islands hpe smart storage energy pack 1 firmware

NOTE: System ROM and firmware messages might display "energy pack" in place of "Smart Storage Battery." Energy pack refers to both HPE Smart Storage batteries and HPE Smart Storage Hybrid capacitors.

We checked for solution and we found this link on HPE site which referred to this known issue. Based on the document this issue only observed on the Gen9 servers which uses iLO firmware of 2.40 or 2.42 and running on System ROM 2.20 (or earlier). As resolution the HPE iLO should be updated to the Firmware version of 2.44 or earlier.

It received several firmware updates and you should run the latest one, but if I recall correctly even the latest one didn't fully solve the problem. We've introduced this generation when they launched in 2014 or 2015 and started decommissioning them in 2018 and dropped support entirely in late 2020.

Hewlett Packard Enterprise offers the HPE Smart Storage Battery as a centralized backup power source options to back up write cache content on the controllers in case of an unplanned server power outage. Once installed, the status of the energy pack displays in HPE iLO iLO.

Remove the HPE Smart Storage Battery or the HPE Smart Storage Hybrid Capacitor. To replace the component, reverse the removal procedure. Be sure to route the energy pack cable back into the channel when connecting it to the system board.

Under the Power tab, it says that the Smart Storage Battery has failed still - despite the new ones being installed this morning. I'm going to try and install the latest HPE Service Pack for the Gen9.

The Smart Update Firmware DVD delivers a collection of firmware for your ProLiant servers and options. Update your ProLiant firmware using one of the following methods; HP Smart Update Manager, ROMPaq (iLO only), or Online ROM flash components. For support documentation, please click on the Installation Instructions Tab.

Use this procedure to remove and replace either the HPE Smart Storage battery or the HPE Smart Storage Hybrid Capacitor. NOTE: System ROM and firmware messages might display "energy pack" in place of "Smart Storage Battery."
